SG084-3 Autumn Amber

SG447-3 Golden Beige

Colors shown approximate the color of broom-finished concrete flatwork made with medium-gray cement. Concrete color is altered by many factors, including cement and aggregate color, slump, finishing practices and curing method. Using the contemplated materials and construction techniques, representative samples should be cast for approval, especially when color matching is important, when special finishes are specified, or when placing vertical concrete.

Concrete should be batched, placed and cured in accordance with Tech-Data Bulletin A-314.
